AIPA Bulletin--Published first week of each month, 12 issues per year. Membership--\$2.00 per year (entitles one to monthly bulletins, report forms, membership card & miscellaneous items. Payable to secretary or Vice President. Foreign membership higher due to postal rates (if interested dues fee upon request).

### Editorial....

Here we are again at the end of another successful year for the AIPA and believe it or not, next month is the start of the fifth year of the AIPA organization. Perhaps the most outstanding feature of the past year as far as our organization was concerned, was its increased and rising recognition not only in US but elsewhere and its spread into foreign circles.

Speaking of the AIPA, if any of you may happen to know of anyone who might be interested in becoming a member, just drop a line with their name and address on a postcard to King Schafer, Kenmore 17, N.Y.. He will send them a sample bulletin and other data.

New members in recently include: Lawrence Crawford, Box 411, Malin, Ore.; Hank Ward, 404 North 14th, Ponca, Oklahoma (original member of club, now back with us again; also longtime member, and a highly popular one of the National Radio Club); William Nieman, 16 Wesson St., Buffalo 10, N.Y.; Richard Nieman, 99 Inson St., Buffalo 10, N.Y.. A grand welcome to all! Renewals of late include: Milton Ray; Frank Hill, Morris Foote; George Palmer of Australia. Glad to have you all with us another year! A change of address: Joseph Howell, Rural Station, Box 245, Dillon, S.C.

Reports from Raymond Bell of Washington, Pa., and Ken Stoll of Buffalo, N.Y. indicate increased activity in F2 DX circles on their FM 30-50 megacycle receivers. Ray reports on Nov 17--BEC audio 41.50mc; Caen audio, 41.25mc, both very strong and steady. Also 42.8 music (German?); Ken reports BEC TV audio very strong.

It has been brought to my attention that Gordon Simkin's proposal in regard to the I DX record setup and division of United States into 6 areas, should be brought before board members for study and vote. I have given Gordon the go ahead on this. Any proposal which might stir and increase interest has my full approval and I am definitely in favor of Gordon's idea. So let's let the board members and Gordon hear from you as to your comments, etc and get this rolling soon. If all goes well, the board should be ready to vote on this issue by late or mid January. Results to be forwarded to Gordon Simkin and your president.

More membership renewals just in: Ray Escoffier, New Orleans, LA. Also welcome mat goes out to new member: N.S. Harper, W5IEO, 1321 N. State St., Jackson, Mississippi.

Deadlines for January bulletin are as follows: Longview, Wash, Cardington Ohio; Loma, Linda, Calif.; all December 26; Buffalo (FCC News), Shelbyville, Ill., (Austin, Texas (Bedford Brown's column), December 28th; Dunkirk, N.Y., (Eastern reports), December 31st. That's it for this month. Best of DX & Very Merry Christmas and Happy New Year to one and all. RS

Various Outlooks On TV DX

A fact that all AIPA members, and other TV-DXers must face, is that our hobby sooner or later will come to an end. This in my opinion, won't be from a falling away due to lack of interest, but for several other reasons that are already on the scene, or will without question develop as time goes on. The following is a brief outline of these various factors from my standpoint.

Even several years ago before the medium of television got "on the road", there were those in the electronics field who visioned the concept of television receivers, as a flat screen mounted on the wall, with all video in color, plus automatic this, that, and the other thing. Now today we find many of these ideas have come to pass, and the flat-screen receiver is only a short time away from one's living room wall. Now, I certainly believe in new ideas, and theory, but strongly against putting worthless junk on the consumer market, and calling it an advancement because it appears different than last years model. This is especially true in the Automotive and appliance fields.

Color television, a new medium, that is being pre-maturely pushed, is as I feel a "Rocket to the Moon" that hasn't left the ground yet.. There's been extra heavy promotion of every sort, yet the darn thing just sits there.. It will in time get moving, and when combined with all the other "Modern" features of today's and tomorrow's receivers, will spell the one certain doom of TV-DX.

Next comes the subject of "Pay Tv". Some say it's "against the public interest," (Who really cares about the public interest?), and others say it it will "afford viewers a better choice of programs," but all in all I must say trivia would still prevail, only you would have to pay for it. Now this "Pay Tv" concept is without question outrageous in every respect, but the very idea of using on the air broadcast frequencies tops them all. I would much rather see AT & T get in on another "grab" via the lease of their lines for this purpose, then for the motor boys of video fare to have their selfish way. Some even propose to have commercials no less! I don't however believe the FCC, or Congress will ever allow the use of broadcast frequencies for "Pay Tv", but it will probably be a long drawn out affair before the issue is closed. How it will turn out via cable, however, is quite a thought! The effect of this on TV-DX would be minor unless numerous stations were transmitting scrambled signals, which could not be logged.

The most serious threat against our hobby is the equipment problem as outlined before. A not much thought of, but in their running element, is the possibility the government may someday desire the use of all or part of our low band channels for defense or other purposes. There has been numerous mentions of this in broadcasting trade publications, and stations operating on these channels have a real worry on their hands. Studies will be made of the spectrum by various sources, users of VHF bands from police departments, to gas companies, will all have their say, but the only group that has a real chance of using these frequencies is the military.

With the ever increasing use of radio controlled weapons, this may become a necessity for national defense, I presume. With all or part of our "good channels" gone, TV DX would become a rather shabby affair, but we all realize the well being of the nation is of primary concern.

All these outlines have a gloomy format, but I bet any money the old AIPA and TV DX will be around for quite some time to come. 50

## MIS'L-NEWS

WODA(TV) ch 41 the Troy-Albany, N.Y. station to change to WTEN(TV), on ch 10  
 BBC-LONDON, ENGLAND been received 1 1/2 Hr. on Long Island, N.Y. (Picture)  
 WITV ch 17 Miami, Fla. may go off the air sometime early 1948.  
 KATV(TV) ch 7 Pine Bluff, Ark. Studios were destroyed by fire Nov. 11th.  
 WLWI(TV) ch 13 Indianapolis, Ind. on as of Nov. 1st.  
 WBOY-TV ch 12 Clarksburg, W.Va. on as of Sunday Nov 10th/ NEC & ABC.  
 WKST-TV ch 45 New Castle, Pa. back on the air as of Sept. 30th.  
 WINR-TV ch 40 Binghamton, N.Y. now on the air. (has been received up here, King.  
 KBTM-TV ch 8 Jonesboro, Ark. surrendered it's CP.. (delete it)  
 WGLV(TV) ch 57 Easton, Pa. will be off the air for six months.  
 WKAR-TV ch 60 E. Lansing Mich. asking for a shift to ch 10 ?????  
 KTRX-TV Kennewick, Wash. granted CP to change to ch 31 from ch 25.  
 CFCM-TV Quebec, Can to have satellite in Clermont, Que on ch 75.  
 Take ch 3 in Cheyenne, Wyo add to Sterling, Col. delete ch 8 from Ainsworth  
 Neb. ans sub ch 8 for ch 3 in McCook, Neb. (as of Dec. 11th.)  
 KTVU ch 2 new station in San Francisco, Calif. (be on the look out for it)  
 KVII ch 7 Amarillo, Tex. will go on the air Dec. 7th.  
 CKBI-TV ch 5 Prince Albert, Sask. due to start Dec. 5th.  
 CHCA-TV ch 6 Red Deer, Alta. went on Nov. 5th.  
 CFJB-TV ch 5 Swift Current, Sask. went on Dec 1st.

WCBS-TV ch 2 New York has a early morning program 6:30 to 7:00 AM EST  
 namely "SUNRISE" "SEMESTER" great books college course. There are many  
 other CBS-TV stations who would like to import the program into their markets

CBS-TV going to abandon the early morning Jimmy Dean Show program and  
 spot, this will mean CBS-TV Network will start at 8:00 AM EST instead of  
 the 7:00 AM. This could mean that your CBS local station will start  
 later in the morning- a chance for you to try for something new on that  
 channel.

Watch for that Winter Skip that may hit this month... Best to you and

MERRY-XMAS.

" RANK COLUMN "

Very nice report, Bill.

Barney Rauch, Peoria, Ill. - Oct. 23, WRCV3, WSYR3, WCB32, WMAR2; 24th, WRCV3, WSYR3, WCB32, WMAR2; 25th, WCB32, WSYR3; 27th, WMAR2, WCB32, WSYR3; 28th, WMAR2, WCB32, WKZO3, WSYR3; 29th, WGR2, WRC44, WSYR3, WMAR2; 30th, WCB32, WMAR2; 31st, WSYR3, WMAR2, WBZ4, WBTB3, Nov 3, WCB32, WMAR2; 4th, WCB32, WMAR2, WRC44, WSYR3; 5th, WCB32, WMAR2 WSYR3; 6th, WMAR2, WCB32, WSYR3, WRC44; 7th, WCB32, WMAR2, WSYR3; 8th WCB32, WMAR2, WSYR3; 9th, WTAR3 (new), WMAR2, WCB32, WSYR3; 10th, WCB32, WSYR3, WRC44; 11th, WBZ4, WRC44; 12th, WRC44; 13th, WCB32, WSYR3, WBZ4; 14th, WCB32, WMAR2, WRC44; 15th, WCB32, WMAR2, WRC44, WSYR3; 16th, WCB32, WMAR2; 17th, KDLO3, WBEN4 (new), WRC4, WRC44, WMAR2, WSYR3; 18th, WCB32, WMAR2, WSYR3, WRC44; 19th, WCB32, WMAR2, WSYR3; 20th, WSYR3, WMAR2, WCB32; 21st, WMAR2; 22nd, WMAR2, WSYR3, WCB32, WRC44. A nice report Barney. He includes two new for this mon.

Locally, I never receive too many new stations, possibly because I never spend enough time looking. The old regulars are always present WCB32, WMAR2, WGR2, WTAR3, WBEN4, WRC44, and WFIL6. I received a nice card from WBEN4, - "your report coincides with our program schedule of that date and time" - a positive verie for my log. No unusual rise in reception reports in spite of the predicted meteor showers. So, good luck for the coming month. cfl

By this time my fellow AIPA'ers have read and digested the content of the message in the November bulletin, and have decided that: (1) The character Cooper is trying to throw some un-needed weight around, or (2) maybe he has something in mind that will help straighten out the verie situation. (Please note how verie is spelled..)

Some of the more left wing members wrote me letters to express their opinions on the subject, telling me in no uncertain terms that they didn't like being told which veries count, and which are not legit. That fine.. I respect the opinion of everyone, no matter how wrong he may be. Perhaps if I was to go a little deeper into this problem, we can bring the whole problem to a head without spilling any unnecessary blood. (Especially mine, I have so little left.)

I think that we will all agree that a letter stating that the station appreciates your report, and thanks you for it, does not really convey the idea that your report has been checked, and is correct. The chance that they did check it against the station log, and find it correct, still exists. But, by the same token, it is just as possible that they did not check the report.

Thus, supposing that some DXer with a very vivid imagination thinks he sees a channel seven station from clear across the country. He writes the station concerned, and may put into his letter anything from "I want to report my reception of your station, at 8 PM PST, at which time you had a station break with an advertisement for Nestles, a Beacon service station on 9th avenue, etc.", to "I would like to report that I saw your television station on July 21, at 9PM". To either of these letters, most stations have a standing policy to send out a form letter, or to write one especially, stating that they appreciate your report, and interest. This, then, is public relations, and they do want your interest, continued, and otherwise. But, this return letter does not constitute a verie.. it amounts to a thank you letter.

But, you say, this is the only type of letter most stations send out. To this I have only one answer.. it is possible that this is so, but not probable. I believe that my form of verification and report writing fairly standard, and therefor, I think that my reports which come back with a verification letter stating that my report of such and such date is correct (has been checked, etc.) are representative. If you have trouble getting such veries, one of two things is wrong: You are not using tact when writing for veries, and you only serve to antagonize the station personnel, or you do not include sufficient information in your report to warrant a positive verie. I have been told by stations, that if DXers will include sufficient information, they will send what constitutes a positive verie. If not, then they will normally send a thank you type letter.

One more slant to this verie business. If you have ever made a record logging, you will most likely want to keep your logging from being topped. But if we, as DXer, begin to accept these thank you letters as veries, then someone will come up with some record breaking loggings which they think are verified by thank you notes. If we accept such verification evidence, there may be a deluge of such crack pot record loggings. May, I say, because I already know of nearly three dozen such loggings which some "so called DXers" try to pass off as real DX, and they swear to having logged it. This type of DXer is usually a pseudo electronic engineer, and can give you any number of helpful(?) hints on making your DX set up hotter, or tell you how he has. (My only suggestion, be ware of such fellows. I don't want them in the DXing hobby.. and I am very sure that we can get along just fine without them.

### Ramblings From Cooper

I of course mean no slander on such fine engineers like Gordon Simkin, fellows who really know what makes TV tick, and from whom we all can learn.

So lets boil this verie business down to just a few simple statements. Suppose we accept these thank you letters as veries, only when it can be assumed that no one—repeat no one—has ever gotten any other type of verie (meaning positive verie) from the station involved. In the case of verie cards (QSL cards) which station send out, lets assume that if these cards have a space for filling in the time, date, etc of your reception, that the reports have been checked for correctness. If not, then the cards are just another thank you. This should take care of all of the questions. Yes, photos also count, and although it is possible to fake, and exchange photos, I will assume that no one is that dishonest. If they are, it will eventually show up. Besides, if it gets down to facts, stations keep records of the ~~xxx~~ particular ids used at any given time, and it is possible to check with them to see if the photograph taken of a record logging actually checks with the recorded data. Tape recorded data is also passable, although, again, it may ofcourse be faked. And, it may be checked for correctness, ~~by~~ electronically, and through the station involved.

After all fellows, I am merely trying to set up high standards for our hobby. If you want them so low that any character with a typewriter and a newspaper from Habana (with the TV schedules) can get a verie, all right. It's your hobby, and it will only be what you make it. What will it be..high or low?

.....  
**Meteor Scatter:**

I guess that I have been a <sup>?</sup>proponent of this form of DXing since it was first brought to prominence by M.W. DeGeer of Tulsa, in 1953. Those of you who read my television DX column in Radio-Electronics magazine (all of you, I hope) may have noticed that I give MS a big play whenever the chance arises. And still, few DXers really make use of it. This I cannot understand, for the life of me. Is it because it maintains that you, as a DXer, have a set in good condition, and spend some time at DXing? I just don't know, what it is. But I do know that those fellows who use MS DX are the DXers that seem to be at the top of the game, not because they are at the top and use MS, but because they use MS, and are at the top..follow me?

Whatever the case, I plan on running an international MS DX test sometime in March, and then again in April. I plan to have the new Mexican channel 3, XEM, put on a test, which will be publicized in my Radio-Electronics column. I hope that all DXers will try for this test, and will send me copies of their logs during the test. From these logs, perhaps we will be able to form some composite theories concerning MS. More about this when the time comes, and information is more certain.

.....  
**FM DX COLUMN**

The folks at Radio-Electronics magazine have approached me with the idea of setting up a FM reception column, similiar to the TV DX column. They had planned originally, to include the FM with the TV, but I think we have changed their thinking on this line. At any rate, if you are interested in FM DXing, please drop Radio-Electronics, 154 West 14th St, New York 11, N.Y. a line expressing your interest, and we will see that we get a column going.

.....Til next time, best of DX, Bob Cooper...Radio-Electronics TV DX Editor.....  
Write me % on Radio-Electronics, as I will be moving soon. (Either to Mexico, or the east coast.)

log now at 92 with 85 verified.

Volume 4, Number 12

\*\*Eastern DX Column....Continued.....

Larry Vehorn, Speedway, Ind. -- Sept 13, tropes, WFL14 WHT50 WLEX18 WSBT34 WNDU46 WSJV52 WTAP15 WHIZ18 (last 2 new); Nov 9, WLM13 (new local); Nov 28, tropes, WNDU46 WSBT34. Larry's log now at 122 with 3 new. Larry also notes that on Nov 14, they had KLRJ2 KTVK3 KOB4 KPH05 at Purdue University. His college address is: Larry Vehorn, Purdue University, Box 312, Residence H-1, West Lafayette, Ind.

Raymond M. Bell, Washington, Pa. -- Report of European TV DX, week of Nov. 17-23: Caen audio 41.25mc; Belfast audio 41.48mc; London audio 41.50mc; Unknown 42.80mc broadcasting; BBC video 43-45mc; video and audio tone signals 48.25mc; earliest reception 0800 (AM); latest 1330 (PM).

Carl Lupton, Shelbyville, Ill. -- Oct 30, Ms, WGR2; WFL6 WBS2; tropes, WKZ03 WJAC6 (520 miles); Nov 2, Ms, WB24 WFL6; tropes, WKZ03; Nov 3, tropes, WSIX8 WSM4 WJAC5 WSFA12 (510 miles) (new) WBBQ13; Nov 5, Ms, WBBN4 (new). Log at 222, 2 new.

That's the Eastern reports for this month. Best of DX to all in upcoming month. Merry Christmas and Happy New Year to all.

Bob Soybold

\*\*\* Late Report.....

David Janowiak, Milwaukee, Wisc. -- Nov 5, tropes, 390 miles, WXY27 WJHK2 WJW4 WBBF4; Nov 6, Ms, WBS2 WMBR2 WB24; Nov 25, tropes, WXY27 WJHK2 CKLW9 CFPL10; Nov 28, Ms, WREG3 (new); correction on October 8th report last month -- WPTA 21 instead of WPMJ 21, UNF tropes. His log now at 182 with 1 new.

\*\* Special Proclamation &amp; Notes from your President, Dateline, 12-5-57---

This is one article I rather not write, but a very disturbing situation has come about in our organization. Since many are letting their views come into the open suddenly, I intend to get into the act too and use my ~~authority~~ authority as president of AIPA.

First of all, certain articles have been getting into our bulletin lately, including this month, which if I had known of beforehand, would have not been printed in our bulletin, unless rectified (rewritten) on certain points. Because of such, in the future no article is to be printed in our bulletin unless seen by myself beforehand and had my approval. Up to now, I have remain silent waiting for member reaction in regard to certain articles in bulletin. Well, the reactions came and I am not surprised at all.

Now to clear things up abit. No rules, decrees, etc are to be made in our club without the approval of board (6 members) and my own approval.

No rule regarding veries will ever get my passing vote as long as I'm president and no other single member has right to set up any such rule. Getting veries in my opinion is in itself a hobby to suit each member as to his own tastes and desires. The AIPA is supposed to be a club of trust and any member who does not trust another is in the wrong club.

Another thing is this "knocking and rapping" of certain so called inferior TV receivers, antennae, etc and especially in a nationwide news publication, is not becoming of our organization! We certainly not going to get new members or renewals that way! There are many who cannot have or afford the best receiver, antenna, etc, but they still can enjoy TV DX just as much and log some real hot DX too! The AIPA is founded to promote TV DXing, not discourage it by criticism, etc. Thus, any articles in future which tend to knocking certain equipment, old or new, without giving good points on such or articles where a single person tries to set up new rules, etc, will not go to print in the AIPA bulletin. That is, unless I approve of same and have board member's OK. Our bulletin is not for answering insults either, but to publish club news!

Bob Soybold
